prices advanced very rapidly. As against

subsequently proving to be the top for the
day. Reports that a prominent Philadel
phin concern was "stopping" all the notices
and chims that Southern spot markets were
holding very firm were largely responsible
for the suoden show of strength. Liverpool quickly stiffened up to confirm with
the firmness here and Europe sent a goodly
number of buying orders to their represenfatives on file side. Walle there was some

July contracts while room bulls picked up
stray lots of August and October.
Reports from spianing centers and the
dry goods districts were very reassuring.
Total expect clearances were quire double

Cargill & Rochardson's Letter.

Houston, Texas, February 26.-Traders re commencing to realize that the reports ally exhaust interior stocks, is the truth and the market has more friends today has any time to two weeks. The figures has any time in two weeks. The figures sested teday were of a bearish character, a though not as excessive as those we have seen seeing.

Mentgemery, Aia, wires: "McFudden cought hearly everything in sight the past wice, paying full prices. Am satisfied this will be the last leavy week as the country a about cleaned up." Macon, Ga., wires:

will be the last heavy weep as the country is about cleaned up." Malon, Ga., wires: "A great many towns sold last bale; not two per cent left on plantations. This applies to Alabama and the Carolinas as well." New Orleans wires: "The temper of the market is very bullish, notwithstanding the continued free run of receipts. Interfer points are offering little or no cetten, and our information leads us to the belief that receipts will soon show a falling off. There has been a favorable change in the conditions of the German trade."

About 40,000 notices were issued in New York today, all supposed to be stopped by McFaddeo brokers. Some more March notices were also issued in New Orleans, but had no effect upon values. Spots were reported in excellent demand at New Orleans and the East. We are still of the belief that any change in cotton will be for a much higher level, although periodical setbacks in the market are to be expected.

Liverpool is lue to be 1,444 higher tomorrow.
